

Subject: Urgent Appeal for International Action and Support for Peace in Iran

February 2026

Dear Members of the European Parliament,
Dear Members of the United States Congress,
Dear Representatives of the United Nations,

We write to you following the mass killings of January 8–9, 2026, during which more than 50,000 civilians were reportedly killed and thousands injured, detained, or permanently harmed by forces of the Islamic Republic and the Islamic Revolutionary Guard Corps.

These acts constitute crimes against humanity under the Rome Statute of the International Criminal Court and serious violations of binding international human rights law, including the International Covenant on Civil and Political Rights, particularly the right to life (Article 6), the prohibition of torture and cruel, inhuman or degrading treatment (Article 7), and the right of peaceful assembly (Article 21).

Under the Charter of the United Nations, Member States are committed to promoting human rights, peace, and the principle of self-determination of peoples. The international community therefore bears a legal and moral responsibility not to remain silent in the face of mass atrocity crimes.

We respectfully call upon democratic governments and international institutions to:

1. Support an independent international investigation into the January events.
2. Publicly affirm the Iranian people's right to self-determination.

3. Engage in dialogue with Crown Prince Reza Pahlavi as a prominent advocate for democratic transition.
4. Support a peaceful transition process culminating in free and fair elections under international supervision.

We further respectfully ask you to endorse and sign this letter as a clear commitment to international law, accountability, democratic legitimacy, and peace.

Support peace. Stand with the people of Iran.

The future of Iran must be determined by its people — freely, democratically, and without coercion.

Respectfully,

Patriotic Doctors of Iran

(Representing a network of concerned physicians inside and outside Iran)
